---

- Writing reports
- HTML
- CSS
- JavaScript
- PHP
- Web-based software engineering
- Proactive learner
- Collaborative
- Works effectively in high-pressure environments.

## Development Experience:

---

2023

### Car Rental System

The Web-Based Car Rental Management System is a comprehensive platform designed for the car rental process for a company. I used PHP, CSS, HTML, and PhpMyAdmin. This project aims to offer a seamless experience for both customers and the company.

2021

### Online Objective Exam

The system, developed using JavaScript, HTML, CSS, and PHP, allows users/students to log in and access features like viewing profiles, attempting exams, registering for exams, and viewing results. Administrators can log in to generate user accounts, create/edit exams, and view exam history and outcomes.

2022

## FLIGHT BOOKING SYSTEM

The Air Express Flight Booking System is a web-based application developed using JavaScript, HTML, CSS, and PHP. It manages flight bookings, management, and searching for customers, offering an automated and convenient alternative to traditional ticket office visits.
